EXECUTIVE OVERVIEW - PRODUCTION

Executive Overview

Operational Risk

Operational Efficiency

Total Production Barrels

▲ 4.33% MoM

1.46bn

▲ 49.98% vs prior period

Capacity Utilization %

▼ 3.83% vs target

76.17%

Below Target 80%

Total Downtime Hr

▲ 4.33% MoM

60.89K

▲ 50.37% vs prior period

Production Gap Value USD

At Risk

\$32.93bn

Revenue lost to capacity shortfall

Site Meeting All Targets

5% complaint

1 / 20

19 sites needs intervention

Fleet is tracking \$28.96M above revenue target YTD. The primary driver is 60.89K downtime hours — -5% below the allowable threshold — concentrated in offshore platforms and LNG terminals. Europe (72.31% utilization) and Africa (73.91%) are the two regions most at risk of missing annual production targets. Only 1 / 20 of 20 sites are meeting all performance targets simultaneously. Immediate intervention is required at the sites in the high-downtime / below-utilization quadrant.

Production Performance vs Target Trend - Are we consistently achieving production targets?

OPERATIONAL RISK & ASSET RELIABILITY

Executive Overview

Operational Risk

Operational Efficiency

Revenue at Risk USD

\$23.98bn

▲ \$12.09 M vs. prior year period

Total Maintenance Cost

\$92.37M

0.09% of revenue · Below Target (1.0%)

Unplanned Maintenance Ratio

72.41%

Critical — reactive maintenance is dominating. Escalate PM schedule.

Incident-Free sites

13 / 20

65% of sites are incident-free. Target is 70%

Total Safety Incidents

1,270

▼ 14 incident below fleet target

Operational Risk Profile by Site - Which operational sites represent the highest financial and operational risk? (Hover to see SiteName ToolTip)

Monthly Safety Incident Heatmap

Dark Green: Below Target | Green: Within 5% of Target | Pink: Exceed Target

SiteName	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Total
ANG Energy Site 2													127
NIG Energy Site 2													107
SAU Energy Site 1													107
USA Energy Site 2													97
IND Energy Site 2													91
NIG Energy Site 1													90
CAN Energy Site 2													89
UAE Energy Site 1													64
Total	85	95	103	100	98	116	122	136	97	101	111	106	1,270

Are higher maint costs effectively reducing equipment downtime?

Conclusion

ANG Energy Site 2 (1), NIG Energy Site 2 (1), and SAU Energy Site 1 (1) are driving 15% of fleet revenue at risk (\$3,625M of \$23,982M total) and 27% of all safety incidents. All three show rising unplanned maintenance — now at 72% fleet-wide — indicating a reactive rather than preventive posture.

Recommended Actions

Immediate: Escalate maintenance plan review at ANG Energy Site 2 and SAU Energy Site 1 — increase planned inspection frequency,...

SUSTAINABILITY & OPERATIONAL EFFICIENCY

Executive Overview

Operational Risk

Operational Efficiency

CO2 emission Gap

2.39M

Below annual target — fleet is tracking clean.

Total Energy Consumption

226.94M

0.155 MWh/bbl — energy efficiency is down 0.09% vs last year.

Cost per Downtime Hr

1.52K

Within benchmark. Every dollar spent on maintenance is delivering downtime reduction

Total CO2 Emissions

87.36M

0.0598 T/bbl — emission intensity improved 0.07% vs prior year.

Total Oil Price

\$1.05M

\$72.07/bbl — down 0.2% MoM; realised revenue is running ahead of spot price

CO₂ Emissions vs Sustainability Target - Are operations meeting established emissions reduction targets?

Maintenance Cost Efficiency by Site Type

Oil Price vs Maintenance Cost Efficiency

Which sites produce efficiently while maintaining lower carbon intensity?

Conclusion

Oil at \$72.07/bbl narrows the margin for inefficiency. CO₂ emissions are 2.39M tons below target. At 0.060 T/bbl intensity and 0.155 MWh/bbl, maintenance cost per downtime hour is \$1,517 — below fleet average — maintenance is delivering value.

Recommended Actions

Prioritise emission reduction at sites exceeding CO₂/barrel target before the annual gap compounds further. Maintenance efficiency is tracking positively — protect current planned maintenance cadence. Energy intensity is at or below fleet average — monitor for regression.
